

Art Bible: Quantum (Balearic Islands)

This document serves as the single source of truth for the design system and aesthetic guidelines of the Quantum project, extracted from the hero section. Adhere to these principles to maintain consistency across the entire application.

1. Typography

The project relies on a high-contrast combination of a classic serif for primary displays and a modern sans-serif for functional text.

- **Primary Serif:** 'Cormorant Garamond', serif
 - **Usage:** Main titles, subtitles, logos, and elegant badges.
 - **Styling:** Primarily uses a light weight (300) with tight line-heights for large displays.
- **Secondary Sans-Serif:** 'Inter', sans-serif
 - **Usage:** Navigation, buttons, metadata, UI elements.
 - **Styling:** Often uppercase, heavily tracked (high letter-spacing, e.g., 0.15em), and small font sizes (e.g., 0.75rem).

2. Color Palette

The color scheme is deeply atmospheric, relying on extreme darks and elegant, metallic-like accents.

- **Background (Dark Base):** #111111
- **Primary Light (Text Base):** #fdf6eb (Warm Off-White)
- **Gold Accent:** #dccaaf (Muted Gold / Champagne)
- **Borders / Interactive Elements:** Transparent gold layers (rgba(220, 202, 175, 0.4) to 0.8).

3. Layout & Structure

The aesthetic is highly cinematic, prioritizing full-bleed visuals and "floating" UI elements.

- **Full Viewport:** Sections generally take up 100vh and use hidden overflow to maintain a controlled frame.
- **Margins/Padding:** Large, elegant breathing room around the edges (e.g., 40px inset for headers and footers).
- **Z-Depth Stacking:**
 - Background media resides at the lowest level (z-index: -2).
 - Dark gradient overlays (z-index: -1) ensure text legibility.
 - UI components float above the content (z-index: 10 to 20).
- **Alignment:** Symmetrical layouts with strong center axes (e.g., main title), offset by split left-right alignments for navigation and footers.

4. UI Elements & Interaction

Interactions are subtle, smooth, and convey luxury.

- **Buttons (CTAs):**
 - Pill-shaped (border-radius: 50px).
 - Thin gold borders with transparent backgrounds.
 - **Hover State:** Smooth 0.4s transition to a lightly tinted background (rgba(220, 202, 175, 0.08)) and brighter text.
- **Navigation Links:**
 - Smooth 0.3s color transition to the Primary Light color.
- **Badges/Stamps:** Circular elements with thin borders (e.g., the 'Q' badge) acting as watermarks or classic brand signatures.
- **Media:** Background videos or large images must always use object-fit: cover with a slight scale (1.02) to hide bleed edges.
